

Aadityaraj Singh Mandloi

Backend Engineer | API Systems | AI-Integrated Backends

aadityarajsinghmandloi104@gmail.com · +91 8103481260 · Indore, India · github.com/aadirajput-dev26 · linkedin.com/in/aadityaraj-singh-mandloi

Backend Engineer focused on AI-integrated systems and API architecture. Experienced building production LLM integrations, voice AI backends, and transactional database systems. Skilled in Node.js, Python, PostgreSQL.

SKILLS

Programming Languages: Python, C++, Javascript/Typescript, SQL

AI / LLM: MCP (Model Context Protocol), OpenAI APIs (Responses, Realtime), Anthropic Claude, prompt engineering & structured outputs, Voice AI (OmniDimension, Vapi.ai, 11Labs), n8n, viaSocket

Backend: FastAPI, Node.js, Express.js, REST APIs, streaming (SSE), Websockets

Databases: PostgreSQL, MongoDB, Redis

EXPERIENCE

Software Engineering Intern — BeyondThe Noise Studios July 2026 – Present

- Developed an AI-powered **Voice Receptionist** to automate inbound call handling, lead qualification, information collection, and appointment workflows, reducing dependency on manual call handling.
- Engineered backend services for an **AI Legal System**, integrating document processing, AI-powered legal analysis, authentication/RBAC, and structured data workflows to streamline legal operations.
- Built **end-to-end AI automation workflows and API integrations** across voice AI, LLM services, databases, and third-party systems, improving workflow efficiency and reducing repetitive manual operations.

AI Automation & QA Intern — Walkover Web Solutions May 2025 – July 2026

- **AI Automation:** Engineered and deployed workflow automations integrating 10+ third-party APIs using Node.js, improving agent decision-making accuracy through refined prompt engineering and structured LLM integration patterns.
- **Backend Development (Gtwy.ai):** Optimized Gtwy.ai's [Node.js](#) and FastAPI backend to manage real-time external traffic, implementing efficient request handling and streaming (SSE) for **LLM-powered workflows**.
- **QA & API Validation:** Scaled REST API validation suites, reducing post-deployment hotfixes by 25% by identifying critical edge cases in PostgreSQL database interactions and rate-limiting logic.

PROJECTS:

- GTWY AI : [Github](#) , [Live Link](#)

Tech Stack : FastAPI , REST APIs, MongoDB, PostgreSQL, LLM Integration

Developed high-accuracy FastAPI backends using PostgreSQL to handle production-scale LLM integration workflows, optimizing data persistence in MongoDB.

Developed features like test cases that helped in testing of LLM responses and reduced the testing load by more than 60%.

- AI-Powered Lawyer assistant : [Github](#) , [Live Link](#)

Tech Stack : TypeScript, Node.js, PostgreSQL, Docker, Railway

Architected and implemented backend services using TypeScript and Node.js, integrating AI-driven automated case drafting and background processing workers for legal updates.

Managed database schema updates using idempotent migration scripts in PostgreSQL and structured modular query/repository layers for maintainable code architecture.

- AI Pricing Engine : [Github](#)

Tech Stack : Express.js , Rest APIs, MongoDB, LLM Integration, Cache

Building a unified API that normalizes AI provider pricing (OpenAI, Anthropic, Gemini) input/output tokens, cached tokens, batch/priority modes into one schema for standardized cost calculation, designed for future auto-sync from provider docs.

EDUCATION

Bachelor of Technology, Computer Science

Chameli Devi Group of Institutions, Indore | Expected Graduation: 2027 | CGPA: 8.2/10
