

CMPDI / CIL Synthetic Statistical Mining Report — Regional Assessment 2025–26

Synthetic Technical & Statistical Mining Report

Designed for testing PDF parsing, OCR, PageIndex structure extraction, table extraction, chunking, embeddings, hybrid retrieval, citation and validation.

Important: All organizations, mines, measurements, names and statistics in this document are synthetic. They do not represent actual CMPDI, CIL or subsidiary data.

Executive Summary

Executive Summary — Table Group 1

Executive Summary presents synthetic operational and geological observations for reporting year 2023. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Energy Consumption	1627.11	1781.72	1749.68	2067.09	2030.12	m3	Medium
Grade Quality	495.8	531.33	585.26	495.19	527.6	GWh	High
Dispatch	5192.61	3971.9	5187.12	5023.41	4479.31	ha	High
Boreholes Completed	4972.71	5482.63	5444.17	5416.58	5270.73	t	Medium
Dispatch	7962.04	10287.1	7827.85	8452.88	9430.93	ML	Medium
Drilling Meterage	1040.52	1111.96	1136.09	1053.85	1113.88	m3	High

Key Indicators

Indicator	Value	Unit	Period	Source Context
Annual production	5,754	kt	2025-26	Executive Summary, Table 3
Exploration coverage	74.50	%	2025-26	Executive Summary, Table 3
Average productivity	6.71	t/man-shift	2025-26	Executive Summary, Table 3
Recovery factor	66.37	%	2025-26	Executive Summary, Table 3

Regional Production Statistics

Regional Production Statistics — Table Group 1

Regional Production Statistics presents synthetic operational and geological observations for reporting year 2024. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Net Geological Reserves	3764.59	3800.95	3779.96	3076.57	3724.15	m	High
Dispatch	5946.95	7302.27	6811.73	5842.88	6059.31	t	High
Coal Recovery	647.26	570.62	507.06	667.77	602.12	ML	High
Energy Consumption	8151.31	9560.46	8322.98	7796.24	7746.67	Mt	Medium
Water Consumption	8173.75	7011.05	6590.96	8406.37	7267.95	m3	High
Coal Recovery	1680.67	1685.02	2002.1	1950.88	1821.95	%	Medium
Exploration Area	10426.94	7872.57	10005.7	9888.37	9453.04	Mt	Medium
Net Geological Reserves	1796.02	1712.18	1616.23	2061.49	2060.0	ha	Medium

Mine-wise Production

Mine-wise Production — Table Group 1

Mine-wise Production presents synthetic operational and geological observations for reporting year 2025. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Project Progress	2057.06	1718.57	1920.04	1902.3	1632.41	ha	Medium
Boreholes Completed	10164.36	9242.82	8924.62	7838.15	8562.33	Mt	High
Coal Production	4594.37	4685.28	3549.51	4077.43	3527.83	ha	High
Energy Consumption	9188.57	7166.87	8104.5	8308.6	9233.86	m	Medium
Exploration Area	7827.99	7077.47	6617.12	6789.88	5927.85	m	High
Net Geological Reserves	415.33	368.76	367.47	348.07	420.9	m	High

Key Indicators

Indicator	Value	Unit	Period	Source Context
Annual production	1,714	kt	2025-26	Mine-wise Production, Table 5
Exploration coverage	91.96	%	2025-26	Mine-wise Production, Table 5
Average productivity	1.67	t/man-shift	2025-26	Mine-wise Production, Table 5
Recovery factor	68.85	%	2025-26	Mine-wise Production, Table 5

Geological Exploration

Geological Exploration — Table Group 1

Geological Exploration presents synthetic operational and geological observations for reporting year 2026. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Energy Consumption	7448.38	7232.01	9353.26	8390.7	8130.9	%	High
Drilling Meterage	1422.72	1598.58	1594.65	1617.52	1755.45	m3	High
Grade Quality	6305.61	5025.99	5178.37	5816.39	5083.21	ha	High
Dispatch	4757.42	3665.16	4666.57	4732.11	3695.95	t	High
Project Progress	3588.17	4001.47	3649.56	3891.97	3448.81	GWh	High
Grade Quality	5123.48	4918.41	4193.41	4790.0	4839.19	%	High

Interpretation Notes

Trend comparisons should be interpreted using the stated period, unit and mine/subsidiary scope. Where multiple tables report the same metric, page and section context should be retained when constructing retrieval citations. Some values are deliberately repeated or slightly transformed across sections to test retrieval disambiguation and claim validation.

Drilling & Borehole Statistics

Drilling & Borehole Statistics — Table Group 1

Drilling & Borehole Statistics presents synthetic operational and geological observations for reporting year 2021. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Drilling Meterage	4576.27	4318.24	5415.82	4322.25	4731.7	t	Medium
Dispatch	9642.24	8580.33	7283.25	8516.61	9456.14	m3	Medium
Overburden Removal	3876.64	4569.35	4090.32	4102.22	3407.77	m3	High
Energy Consumption	9612.75	10878.3	8634.15	10206.96	8739.91	GWh	High
Energy Consumption	5019.04	5792.05	5803.05	4285.16	5287.64	m3	High
Reclamation Area	3637.43	3200.94	3454.06	3126.53	3331.65	Mt	High
Dispatch	9774.91	9503.59	10612.79	9628.52	7720.11	Mt	Medium
Overburden Removal	2131.37	2595.61	2486.24	2050.42	2144.2	m	Medium

Key Indicators

Indicator	Value	Unit	Period	Source Context
Annual production	6,817	kt	2025-26	Drilling & Borehole Statistics, Table 7
Exploration coverage	63.75	%	2025-26	Drilling & Borehole Statistics, Table 7
Average productivity	5.39	t/man-shift	2025-26	Drilling & Borehole Statistics, Table 7
Recovery factor	69.71	%	2025-26	Drilling & Borehole Statistics, Table 7

Reserve & Resource Estimation

Reserve & Resource Estimation — Table Group 1

Reserve & Resource Estimation presents synthetic operational and geological observations for reporting year 2022. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Dispatch	4825.08	4743.69	3707.87	4163.08	3961.23	t	High
Boreholes Completed	2347.05	2075.55	2422.4	2285.23	2195.49	t	High
Overburden Removal	2591.79	2829.46	2622.15	2264.91	2247.93	Mt	High
Project Progress	813.12	653.32	662.47	628.43	785.56	GWh	Medium
Safety Incidents	3009.33	2422.23	2358.98	2902.07	2371.38	GWh	High
Manpower	6141.09	5469.29	5937.23	6055.31	5172.89	ha	Medium

Coal Quality & Grade Analysis

Coal Quality & Grade Analysis — Table Group 1

Coal Quality & Grade Analysis presents synthetic operational and geological observations for reporting year 2023. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Overburden Removal	7250.75	7222.45	5896.31	7134.88	6392.17	Mt	High
Drilling Meterage	471.0	433.28	416.0	385.83	487.34	ML	Medium
Reclamation Area	7153.82	7511.22	6395.31	5734.38	7583.89	Mt	High
Water Consumption	3838.68	4649.16	4284.96	4924.77	4416.64	m3	High
Project Progress	8762.21	8305.65	9533.02	9795.82	10693.91	m	High
Grade Quality	1403.06	1391.97	1274.51	1290.39	1077.75	Mt	Medium

Key Indicators

Indicator	Value	Unit	Period	Source Context
Annual production	6,267	kt	2025-26	Coal Quality & Grade Analysis, Table 2
Exploration coverage	83.68	%	2025-26	Coal Quality & Grade Analysis, Table 2
Average productivity	3.35	t/man-shift	2025-26	Coal Quality & Grade Analysis, Table 2
Recovery factor	84.01	%	2025-26	Coal Quality & Grade Analysis, Table 2

Overburden & Stripping Ratio

Overburden & Stripping Ratio — Table Group 1

Overburden & Stripping Ratio presents synthetic operational and geological observations for reporting year 2024. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Reclamation Area	1971.26	2304.58	2103.23	2363.2	1958.71	Mt	High
Reclamation Area	53.78	52.04	62.68	59.37	54.12	%	High
Energy Consumption	3652.87	3983.98	4178.62	3916.28	3825.92	Mt	Medium
Energy Consumption	4936.02	6506.02	5194.72	5332.87	6240.08	ha	High
Coal Production	4811.06	4311.65	4522.34	4102.78	4680.0	m	Medium
Safety Incidents	6487.76	5963.8	6826.08	5464.86	7024.68	m3	High
Drilling Meterage	3298.42	3193.77	2969.99	3059.8	3408.06	m3	High
Manpower	8277.26	9087.17	8094.9	8991.46	8843.25	GWh	Medium

Dispatch & Logistics

Dispatch & Logistics — Table Group 1

Dispatch & Logistics presents synthetic operational and geological observations for reporting year 2025. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Dispatch	2937.06	2701.22	2512.28	2501.8	2844.13	%	Medium
Drilling Meterage	4572.46	4983.29	4264.15	4416.3	5252.73	m3	High
Manpower	3785.81	3494.21	3571.66	3826.13	3719.75	%	High
Coal Production	3901.63	3398.56	3830.04	4030.03	2978.84	GWh	High
Coal Production	5572.01	5747.29	6709.61	6602.35	6031.64	m	High
Drilling Meterage	4538.3	3931.36	4389.54	4901.29	4491.27	ha	High

Key Indicators

Indicator	Value	Unit	Period	Source Context
Annual production	3,291	kt	2025-26	Dispatch & Logistics, Table 4
Exploration coverage	97.17	%	2025-26	Dispatch & Logistics, Table 4
Average productivity	4.73	t/man-shift	2025-26	Dispatch & Logistics, Table 4
Recovery factor	90.93	%	2025-26	Dispatch & Logistics, Table 4

Interpretation Notes

Trend comparisons should be interpreted using the stated period, unit and mine/subsidiary scope. Where multiple tables report the same metric, page and section context should be retained when constructing retrieval citations. Some values are deliberately repeated or slightly transformed across sections to test retrieval disambiguation and claim validation.

Land Reclamation

Land Reclamation — Table Group 1

Land Reclamation presents synthetic operational and geological observations for reporting year 2026. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Water Consumption	10028.43	8252.08	9309.41	10653.78	8552.05	Mt	High
Net Geological Reserves	3552.35	3416.33	4045.54	3347.57	4128.6	GWh	High
Coal Recovery	1412.14	1540.08	1220.17	1633.22	1299.18	m3	Medium
Coal Production	654.74	516.59	483.63	507.94	503.12	m3	Medium
Drilling Meterage	8365.52	8536.18	7019.98	8132.14	8488.17	m3	High
Exploration Area	1913.81	2124.26	1912.07	2111.72	1791.59	m	High

Water Management

Water Management — Table Group 1

Water Management presents synthetic operational and geological observations for reporting year 2021. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Water Consumption	3599.53	4490.89	4594.32	4262.17	3624.99	t	High
Reclamation Area	7621.44	6239.32	7588.84	6107.99	7058.24	%	High
Grade Quality	6401.34	6782.7	6542.98	6006.21	6595.28	Mt	Medium
Boreholes Completed	9892.31	8985.89	10041.81	9359.27	8568.72	m	High
Exploration Area	6992.43	7534.29	7891.58	7323.97	6464.52	ML	High
Dispatch	3444.25	3332.03	3356.81	3724.98	4055.28	t	Medium
Drilling Meterage	1364.37	1443.46	1514.74	1363.87	1476.84	%	High
Boreholes Completed	295.71	309.8	361.31	319.07	349.24	%	Medium

Key Indicators

Indicator	Value	Unit	Period	Source Context
Annual production	6,832	kt	2025-26	Water Management, Table 6
Exploration coverage	73.30	%	2025-26	Water Management, Table 6
Average productivity	6.12	t/man-shift	2025-26	Water Management, Table 6
Recovery factor	71.92	%	2025-26	Water Management, Table 6

Energy Consumption

Energy Consumption — Table Group 1

Energy Consumption presents synthetic operational and geological observations for reporting year 2022. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Safety Incidents	7105.33	7057.14	6734.23	6911.87	6731.51	ha	High
Drilling Meterage	7593.79	8418.58	8868.06	8437.56	9448.43	m	High
Drilling Meterage	5480.36	5155.16	6178.21	5667.02	7044.21	Mt	Medium
Manpower	7233.07	6991.87	7718.41	8237.46	7868.93	t	High
Coal Recovery	7070.78	6944.07	8052.47	8274.13	8558.59	ha	High
Boreholes Completed	10876.84	8233.67	8732.38	9680.45	9246.32	m	Medium

Environmental Monitoring

Environmental Monitoring — Table Group 1

Environmental Monitoring presents synthetic operational and geological observations for reporting year 2023. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Grade Quality	8618.52	7119.84	7833.86	7442.25	7785.07	t	Medium
Safety Incidents	1964.28	1555.35	1557.14	1805.55	1527.31	ha	Medium
Overburden Removal	2250.35	2636.65	2760.27	2499.29	2447.72	Mt	Medium
Coal Recovery	6615.57	7016.48	7093.41	8394.88	7897.07	m	High
Overburden Removal	8381.53	8157.04	8502.39	8137.05	7892.49	Mt	Medium
Safety Incidents	10912.44	9421.13	9512.53	9003.28	9307.76	Mt	Medium

Key Indicators

Indicator	Value	Unit	Period	Source Context
Annual production	9,290	kt	2025-26	Environmental Monitoring, Table 1
Exploration coverage	73.82	%	2025-26	Environmental Monitoring, Table 1
Average productivity	5.15	t/man-shift	2025-26	Environmental Monitoring, Table 1
Recovery factor	90.35	%	2025-26	Environmental Monitoring, Table 1

Mine Safety Statistics

Mine Safety Statistics — Table Group 1

Mine Safety Statistics presents synthetic operational and geological observations for reporting year 2024. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Safety Incidents	5645.67	4629.29	4986.46	5769.82	6097.36	t	Medium
Coal Recovery	4688.97	4964.3	4098.03	4604.57	4491.5	Mt	High
Water Consumption	7690.62	7351.14	6400.78	7009.98	6975.21	m3	High
Net Geological Reserves	7398.07	6489.03	7961.98	7666.87	7076.17	%	High
Net Geological Reserves	4045.56	4938.97	4157.29	4309.78	4963.74	%	High
Coal Production	3220.08	3327.46	3199.52	3141.34	2738.97	Mt	Medium
Manpower	4790.83	5200.22	4292.44	5632.85	5059.56	m	Medium
Manpower	5355.77	5358.17	4579.39	6104.65	5970.07	%	High

Interpretation Notes

Trend comparisons should be interpreted using the stated period, unit and mine/subsidiary scope. Where multiple tables report the same metric, page and section context should be retained when constructing retrieval citations. Some values are deliberately repeated or slightly transformed across sections to test retrieval disambiguation and claim validation.

Manpower & Productivity

Manpower & Productivity — Table Group 1

Manpower & Productivity presents synthetic operational and geological observations for reporting year 2025. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Energy Consumption	2634.92	2820.14	2643.83	2443.99	2920.4	%	High
Dispatch	8243.11	8380.87	9605.83	10046.1	8218.74	m3	High
Boreholes Completed	6657.34	7669.4	6493.05	5895.08	7530.04	%	High
Dispatch	9050.0	8605.16	9865.65	8736.27	10363.42	m	Medium

Energy Consumption	2601.63	2217.17	2607.47	2681.2	2915.68	%	High

Key Indicators

Indicator	Value	Unit	Period	Source Context
Annual production	8,686	kt	2025-26	Manpower & Productivity, Table 3
Exploration coverage	55.66	%	2025-26	Manpower & Productivity, Table 3
Average productivity	2.15	t/man-shift	2025-26	Manpower & Productivity, Table 3
Recovery factor	89.74	%	2025-26	Manpower & Productivity, Table 3

Project Progress

Project Progress — Table Group 1

Project Progress presents synthetic operational and geological observations for reporting year 2026. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Manpower	1294.04	1504.29	1238.95	1387.96	1369.92	ML	Medium
Coal Recovery	8663.66	8479.87	9646.38	9764.42	10092.22	t	Medium
Overburden Removal	4162.03	4534.58	4632.93	4310.66	3908.51	m3	Medium
Safety Incidents	1706.88	1846.98	1964.19	1484.3	1904.15	Mt	High
Net Geological Reserves	6452.52	7356.73	7438.25	7969.6	6509.77	m3	Medium
Coal Recovery	6724.47	5934.66	7335.51	5730.96	6393.94	Mt	High

Subsidiary Comparison

Subsidiary Comparison — Table Group 1

Subsidiary Comparison presents synthetic operational and geological observations for reporting year 2021. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Exploration Area	234.8	205.75	193.85	211.2	179.53	ML	Medium
Exploration Area	7615.71	7076.3	6718.86	8329.74	7992.35	m3	High
Grade Quality	9217.06	9020.95	10274.98	8169.4	10681.45	GWh	High
Coal Production	10678.09	10411.21	11011.98	10818.21	10309.26	Mt	High
Water Consumption	5427.68	5372.21	5488.44	6458.58	6481.43	ha	Medium
Overburden Removal	668.55	698.8	730.63	765.67	618.37	Mt	High
Safety Incidents	6294.46	6196.07	7117.6	8095.32	7098.24	Mt	High
Exploration Area	9367.86	7605.56	9113.6	8940.15	8059.58	m3	High

Key Indicators

Indicator	Value	Unit	Period	Source Context
Annual production	4,896	kt	2025-26	Subsidiary Comparison, Table 5
Exploration coverage	91.99	%	2025-26	Subsidiary Comparison, Table 5
Average productivity	5.98	t/man-shift	2025-26	Subsidiary Comparison, Table 5
Recovery factor	93.34	%	2025-26	Subsidiary Comparison, Table 5

Five-Year Trends

Five-Year Trends — Table Group 1

Five-Year Trends presents synthetic operational and geological observations for reporting year 2022. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Coal Recovery	9003.86	10291.21	7937.83	9521.33	9273.54	Mt	Medium
Grade Quality	5496.35	5750.42	5327.63	7067.43	6413.74	m	Medium
Overburden Removal	8881.71	7347.64	7615.71	6937.3	8974.87	Mt	High
Overburden Removal	1539.35	1703.4	1622.71	1613.16	1926.55	GWh	Medium
Safety Incidents	2973.79	2777.48	2929.74	2744.03	3019.48	Mt	High
Safety Incidents	5702.0	6161.31	5740.05	5995.68	7244.28	ML	Medium

Risk Indicators

Risk Indicators — Table Group 1

Risk Indicators presents synthetic operational and geological observations for reporting year 2023. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Project Progress	5214.77	5635.87	6989.77	6952.23	6708.13	m3	Medium
Drilling Meterage	349.8	387.05	473.34	446.76	370.16	m	Medium
Drilling Meterage	3744.9	3513.92	4474.8	3329.24	4421.04	ha	High
Reclamation Area	4669.31	3724.92	4762.48	3754.93	4065.48	m	Medium
Net Geological Reserves	282.59	270.21	340.27	318.35	340.67	%	High
Boreholes Completed	6156.65	5358.9	6138.1	7009.66	5229.25	Mt	High

Key Indicators

Indicator	Value	Unit	Period	Source Context
Annual production	1,710	kt	2025-26	Risk Indicators, Table 7
Exploration coverage	57.62	%	2025-26	Risk Indicators, Table 7
Average productivity	4.36	t/man-shift	2025-26	Risk Indicators, Table 7
Recovery factor	74.25	%	2025-26	Risk Indicators, Table 7

Interpretation Notes

Trend comparisons should be interpreted using the stated period, unit and mine/subsidiary scope. Where multiple tables report the same metric, page and section context should be retained when constructing retrieval citations. Some values are deliberately repeated or slightly transformed across sections to test retrieval disambiguation and claim validation.

Annexure Statistical Tables

Annexure Statistical Tables — Table Group 1

Annexure Statistical Tables presents synthetic operational and geological observations for reporting year 2024. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Energy Consumption	1857.61	2109.25	1607.57	1611.95	1928.42	m3	High
Exploration Area	9892.32	8904.8	9550.2	8648.4	9276.4	GWh	High
Boreholes Completed	2196.1	2067.92	2142.87	2112.32	1791.16	%	High
Grade Quality	6348.47	5555.83	6167.63	5396.48	5396.43	Mt	High
Manpower	6898.44	8871.67	6965.79	6974.39	8631.74	ha	Medium
Coal Production	9670.58	10001.3	9209.99	10622.83	10828.97	GWh	Medium
Coal Production	5038.84	4647.92	5003.5	4429.63	5127.35	m	High
Net Geological Reserves	8991.61	10186.14	9616.14	10321.05	10435.75	t	Medium

Executive Summary

Executive Summary — Table Group 2

Executive Summary presents synthetic operational and geological observations for reporting year 2025. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Project Progress	3853.0	4210.24	4925.48	5158.16	4323.94	ha	High
Water Consumption	5841.68	7307.5	7811.49	5890.09	6847.95	GWh	High
Dispatch	5138.81	5425.61	5449.31	6596.69	5954.81	t	High
Manpower	936.28	821.57	932.85	882.53	870.08	Mt	High
Boreholes Completed	7578.99	8459.8	8051.11	9152.46	8617.85	Mt	High
Drilling Meterage	7731.26	5729.46	6051.67	7647.02	7263.8	Mt	High

Key Indicators

Indicator	Value	Unit	Period	Source Context
Annual production	6,575	kt	2025-26	Executive Summary, Table 2
Exploration coverage	60.16	%	2025-26	Executive Summary, Table 2
Average productivity	4.48	t/man-shift	2025-26	Executive Summary, Table 2
Recovery factor	75.21	%	2025-26	Executive Summary, Table 2

Regional Production Statistics

Regional Production Statistics — Table Group 2

Regional Production Statistics presents synthetic operational and geological observations for reporting year 2026. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Manpower	6503.49	5876.75	6557.65	6784.18	6133.8	GWh	Medium
Coal Production	6233.93	8377.19	8236.94	7556.85	7551.25	GWh	High
Overburden Removal	5795.98	6466.52	7517.98	7113.78	7585.73	ML	High
Grade Quality	1677.49	1880.92	1842.71	1767.24	1716.9	ML	High
Net Geological Reserves	2482.12	2997.38	2902.42	2590.86	3129.7	ML	Medium
Coal Recovery	2315.84	2242.66	2284.07	2614.16	2742.74	m3	High

Mine-wise Production

Mine-wise Production — Table Group 2

Mine-wise Production presents synthetic operational and geological observations for reporting year 2021. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Boreholes Completed	8251.74	8519.94	8562.22	8835.48	9375.51	ML	Medium
Net Geological Reserves	2535.92	2560.2	2695.46	2832.8	2662.19	ML	Medium
Overburden Removal	5198.55	4479.83	5040.94	4902.57	5508.52	m3	Medium
Water Consumption	8247.35	8787.46	9818.61	9224.82	7300.15	m	High
Water Consumption	8041.59	9222.57	7910.01	8842.79	8911.13	m3	Medium
Energy Consumption	2511.38	3146.04	3415.07	2971.78	3053.18	ML	High
Project Progress	4627.08	5225.35	5077.63	4109.18	5003.41	ML	High
Net Geological Reserves	1668.52	1578.13	1507.17	1823.34	1882.85	ha	High

Key Indicators

Indicator	Value	Unit	Period	Source Context
Annual production	2,535	kt	2025-26	Mine-wise Production, Table 4
Exploration coverage	80.06	%	2025-26	Mine-wise Production, Table 4
Average productivity	2.13	t/man-shift	2025-26	Mine-wise Production, Table 4
Recovery factor	72.54	%	2025-26	Mine-wise Production, Table 4

Geological Exploration

Geological Exploration — Table Group 2

Geological Exploration presents synthetic operational and geological observations for reporting year 2022. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Energy Consumption	5840.43	7078.73	5745.97	6758.6	6939.19	ML	High
Energy Consumption	7727.14	9378.77	8915.15	7511.82	8343.74	m	High
Boreholes Completed	7402.59	9540.17	7304.54	7677.17	8979.68	t	Medium
Net Geological Reserves	2322.43	2001.25	2020.54	2391.74	2342.36	ha	Medium
Dispatch	761.62	828.65	717.86	770.04	729.83	%	High
Reclamation Area	3817.71	4471.32	4026.63	4506.01	3894.15	%	High

Interpretation Notes

Trend comparisons should be interpreted using the stated period, unit and mine/subsidiary scope. Where multiple tables report the same metric, page and section context should be retained when constructing retrieval citations. Some values are deliberately repeated or slightly transformed across sections to test retrieval disambiguation and claim validation.

Drilling & Borehole Statistics

Drilling & Borehole Statistics — Table Group 2

Drilling & Borehole Statistics presents synthetic operational and geological observations for reporting year 2023. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Boreholes Completed	5210.9	4787.13	4657.41	4262.29	4320.25	ha	High
Coal Production	9099.24	8263.68	7082.01	9025.44	9039.23	Mt	High
Boreholes Completed	2542.26	3100.82	2431.48	2687.68	3137.12	m	High
Project Progress	6742.08	5759.18	5724.02	5681.14	5704.41	m3	High
Drilling Meterage	493.2	456.17	559.98	496.0	464.09	t	High
Project Progress	8488.79	7056.19	8513.12	7852.62	6712.9	m3	High

Key Indicators

Indicator	Value	Unit	Period	Source Context
Annual production	5,393	kt	2025-26	Drilling & Borehole Statistics, Table 6
Exploration coverage	64.27	%	2025-26	Drilling & Borehole Statistics, Table 6
Average productivity	2.19	t/man-shift	2025-26	Drilling & Borehole Statistics, Table 6
Recovery factor	92.03	%	2025-26	Drilling & Borehole Statistics, Table 6

Reserve & Resource Estimation

Reserve & Resource Estimation — Table Group 2

Reserve & Resource Estimation presents synthetic operational and geological observations for reporting year 2024. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Water Consumption	8694.17	9707.04	8161.45	7829.13	8163.74	%	High
Overburden Removal	8708.0	7130.23	8486.78	7743.34	7475.91	GWh	High
Water Consumption	5476.62	5815.23	6291.98	5178.51	6888.94	m3	Medium
Reclamation Area	9361.39	8592.08	7247.43	9601.24	7311.45	GWh	High
Exploration Area	309.0	278.81	296.9	340.28	282.57	ML	High
Coal Production	6055.95	6569.88	5343.31	6503.86	5899.58	%	Medium
Manpower	1989.78	2521.37	2283.93	2161.49	1975.4	m	High
Net Geological Reserves	5284.29	6086.29	5331.1	4840.63	5687.05	m	High

Coal Quality & Grade Analysis

Coal Quality & Grade Analysis — Table Group 2

Coal Quality & Grade Analysis presents synthetic operational and geological observations for reporting year 2025. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Net Geological Reserves	954.38	807.62	750.6	817.54	960.89	%	High
Net Geological Reserves	3183.85	3185.21	3623.22	3207.53	3496.82	GWh	High
Grade Quality	3126.26	2903.8	2664.59	3240.78	2889.2	GWh	High
Safety Incidents	7146.35	6399.26	8399.16	7148.79	8708.71	Mt	Medium
Boreholes Completed	875.03	1058.6	969.11	1111.99	1072.28	t	High
Coal Recovery	6299.96	6377.33	8074.14	7090.84	7130.27	t	Medium

Key Indicators

Indicator	Value	Unit	Period	Source Context
Annual production	3,713	kt	2025-26	Coal Quality & Grade Analysis, Table 1
Exploration coverage	84.20	%	2025-26	Coal Quality & Grade Analysis, Table 1
Average productivity	7.46	t/man-shift	2025-26	Coal Quality & Grade Analysis, Table 1
Recovery factor	73.28	%	2025-26	Coal Quality & Grade Analysis, Table 1

Overburden & Stripping Ratio

Overburden & Stripping Ratio — Table Group 2

Overburden & Stripping Ratio presents synthetic operational and geological observations for reporting year 2026. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Boreholes Completed	1373.66	1354.45	1297.68	1406.33	1233.56	m3	High
Safety Incidents	3174.47	3059.91	3238.5	2931.9	2930.38	%	High
Water Consumption	5148.86	5624.18	4378.41	4277.85	4181.62	ha	Medium
Dispatch	1677.67	1754.79	1764.13	1607.62	1628.09	Mt	High
Coal Recovery	2879.58	3066.62	2815.26	2950.65	2703.35	m3	High
Boreholes Completed	2181.14	2378.54	2276.4	2438.58	2358.12	ha	Medium

Dispatch & Logistics

Dispatch & Logistics — Table Group 2

Dispatch & Logistics presents synthetic operational and geological observations for reporting year 2021. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Project Progress	1289.04	1449.42	1603.21	1488.26	1455.51	GWh	Medium
Overburden Removal	2483.4	2254.36	2120.86	2280.57	2047.67	ha	High
Grade Quality	9618.51	7279.24	7467.27	7546.18	7578.02	ML	Medium
Drilling Meterage	6706.5	5897.64	5454.42	5067.17	5288.81	Mt	High

Water Consumption	6351.37	5837.69	6319.52	4851.92	4883.39	Mt	Medium
Drilling Meterage	9399.19	10090.78	9652.47	10054.0	9004.54	Mt	High
Drilling Meterage	6422.5	5926.0	5897.11	6736.98	6835.74	m	High

Key Indicators

Indicator	Value	Unit	Period	Source Context
Annual production	3,553	kt	2025-26	Dispatch & Logistics, Table 3
Exploration coverage	68.44	%	2025-26	Dispatch & Logistics, Table 3
Average productivity	5.94	t/man-shift	2025-26	Dispatch & Logistics, Table 3
Recovery factor	85.23	%	2025-26	Dispatch & Logistics, Table 3

Interpretation Notes

Trend comparisons should be interpreted using the stated period, unit and mine/subsidiary scope. Where multiple tables report the same metric, page and section context should be retained when constructing retrieval citations. Some values are deliberately repeated or slightly transformed across sections to test retrieval disambiguation and claim validation.

Land Reclamation

Land Reclamation — Table Group 2

Land Reclamation presents synthetic operational and geological observations for reporting year 2022. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Coal Recovery	6746.13	5155.2	5606.84	5966.83	5509.98	%	High
Exploration Area	6984.49	6614.69	7087.99	7317.88	7883.76	m	High
Coal Recovery	6324.3	5944.42	4995.2	4940.72	6435.46	%	High
Project Progress	5228.19	4542.0	5052.78	5160.57	4795.84	ML	High
Coal Production	4767.62	5363.31	5012.65	4730.25	4831.89	m3	High
Manpower	4821.64	4874.21	4298.67	4348.78	4594.23	m	High

Water Management

Water Management — Table Group 2

Water Management presents synthetic operational and geological observations for reporting year 2023. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Reclamation Area	4225.02	4904.16	5314.35	4550.13	5668.62	m3	High
Overburden Removal	6393.46	7710.22	6789.68	6377.17	5902.18	GWh	Medium
Coal Production	691.29	867.62	891.24	816.85	720.05	ha	High
Project Progress	4812.98	6252.61	5815.74	5050.68	5115.25	%	Medium
Water Consumption	5043.92	4293.7	4808.74	4445.9	4948.39	Mt	Medium
Coal Recovery	513.69	460.55	523.1	573.86	510.74	m	Medium

Key Indicators

Indicator	Value	Unit	Period	Source Context
Annual production	2,041	kt	2025-26	Water Management, Table 5
Exploration coverage	80.09	%	2025-26	Water Management, Table 5
Average productivity	2.33	t/man-shift	2025-26	Water Management, Table 5
Recovery factor	81.76	%	2025-26	Water Management, Table 5

Energy Consumption

Energy Consumption — Table Group 2

Energy Consumption presents synthetic operational and geological observations for reporting year 2024. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Water Consumption	5706.14	6810.45	5465.36	7364.69	5627.65	t	High
Net Geological Reserves	6288.82	7518.24	6879.38	7710.89	8042.83	t	Medium
Manpower	7936.16	8268.19	9219.32	8833.57	8236.33	ha	High
Project Progress	8546.55	8581.22	9792.02	9644.0	9419.01	Mt	Medium
Dispatch	3762.95	3046.63	3067.22	3746.21	3789.27	Mt	Medium
Drilling Meterage	7775.83	7860.32	9416.22	9048.34	7659.89	m3	Medium
Energy Consumption	8817.44	10590.72	10112.95	10515.26	10072.31	Mt	High
Exploration Area	1309.46	1352.04	1269.58	1368.32	1245.46	Mt	Medium

Environmental Monitoring

Environmental Monitoring — Table Group 2

Environmental Monitoring presents synthetic operational and geological observations for reporting year 2025. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Safety Incidents	4073.85	4784.28	4741.44	4230.05	4864.7	m	Medium
Drilling Meterage	812.69	881.79	924.46	987.16	823.88	ha	High
Energy Consumption	7980.71	7261.21	9239.77	7576.22	8416.69	m3	Medium
Water Consumption	3995.06	4234.12	4505.71	4475.9	3537.09	ha	High
Coal Recovery	7340.66	6039.4	7256.4	7523.05	6262.5	t	High
Exploration Area	9906.18	10911.58	9079.63	9447.94	10025.13	%	High

Key Indicators

Indicator	Value	Unit	Period	Source Context
Annual production	9,461	kt	2025-26	Environmental Monitoring, Table 7
Exploration coverage	75.12	%	2025-26	Environmental Monitoring, Table 7
Average productivity	2.47	t/man-shift	2025-26	Environmental Monitoring, Table 7
Recovery factor	64.72	%	2025-26	Environmental Monitoring, Table 7

Mine Safety Statistics

Mine Safety Statistics — Table Group 2

Mine Safety Statistics presents synthetic operational and geological observations for reporting year 2026. The dataset is intentionally structured to resemble a technical mining report and contains repeated cross-references between mine-level production, exploration activity, reserves, dispatch, environmental indicators and safety statistics. Values are synthetic and are intended only for document-processing, OCR, structure extraction, table parsing, retrieval and citation testing. The report distinguishes observed measurements from derived indicators and preserves page and section context.

Parameter	2021-22	2022-23	2023-24	2024-25	2025-26	Unit	Confidence
Manpower	8127.53	8303.14	6543.65	7350.4	7245.29	m	High
Water Consumption	7582.54	6894.08	5947.56	7234.16	6164.1	ha	High
Net Geological Reserves	3547.31	4058.79	4144.54	3900.52	3985.55	t	High
Energy Consumption	6466.36	5230.18	5340.14	5709.8	5903.1	Mt	Medium
Overburden Removal	4791.64	4555.25	5742.06	4969.92	4932.53	ML	High
Safety Incidents	10506.75	10042.61	10175.91	10246.4	10056.07	m3	Medium

Interpretation Notes

Trend comparisons should be interpreted using the stated period, unit and mine/subsidiary scope. Where multiple tables report the same metric, page and section context should be retained when constructing retrieval citations. Some values are deliberately repeated or slightly transformed across sections to test retrieval disambiguation and claim validation.
